## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 4-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Cass '738.

Cass teaches an ant-free pet dishes which is structurally similar to the Applicant's claimed double level ant-proof pet food bowl. More specifically, the apparatus includes a top food container 14 having a first recess at a center of a bottom side of a base of said food container. A bottom water container 20 having a second recess at a center of an upper side of a base of said water container is provided. And a central post 16 having an upper end inserted into said first recess, and a lower end inserted into said second recess. Regarding claim 4, the top and bottom food container have a circular periphery. As seen in Figure 2, the top food container is smaller in diameter than said bottom food container. In regards to claim 6, the central post 16 is removable from said top food container and said bottom water container. Regarding claims 7 and 8, the central post 16 is cylindrical and includes a middle portion having a diameter larger than said upper end and said lower end. Regarding claim 9, the side wall of the

bottom water container is considered to be an inclined surface. As for claim 10, stub 22 is considered to be an alignment means.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cass '738 in view of O'Donnell '671.

Cass does not discuss the use of a void space in the higher positioned container. O'Donnell teaches a container positioned over another container. The upper container includes a void space. Regarding claims 2 and 3, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the upper container of Cass with a void space, in view of the teachings of O'Donnell, in order to provide greater access to the lowermost container.

***Conclusion***

Summary: Claims 1-10 have been rejected.
